SCIENCE AND LAW IN THE AGE OF DIGITALIZATION

PHILOSOPHY OF LAW

Technological singularity and personal identity. Reflections for an ethical-legal debate

- I. Neuro-implants and the therapeutic use of Artificial Intelligence
- II. The new generation of digital rights and the recognition of neurorights
- III. When a person becomes an avatar: the novo homo ludens in the Internet Metaverse
- IV. Conclusion

Rights in the age of data

- I. From the "age of rights" to the "age of data"?
- II. Reconfiguration of concepts and/or configuration of a new paradigm?
- III. The challenge of trusting (human) rights

Climate change and digitization: the role of AI from a "rights-based" perspective

- I. Introduction
- II. The bioethical understanding of Artificial Intelligence within the theoretical-legal reflection on "climate change"
- III. The role of Artificial Intelligence in struggling climate change in light of the principle of beneficence
- IV. Sparks for a philosophical-legal perspective useful for promoting AI in the fight against climate instability
- V. The advantages of using AI in the restraining of the effects of climate change
- VI. Conclusions

CONSTITUTIONAL LAW

Non-discrimination and the AI Act

- I. Introduction
- II. (Non-)discrimination in the age of AI
- III. Non-discrimination in the EU AI act
- IV. Governance challenges and the rights-based approach as an alternative
- V. Conclusion

Digitized information and information sustainability

- I. The digital ecosystem: an introduction
- II. The problem of pluralism of information online

- III. Infodemia
- IV. Information sustainability
- V. Some concluding remarks

A premise for digitisation: the Right To Internet Access

- I. Introduction
- II. The nature of the right to internet access
- III. Internet access in the Constitution: where and how
- IV. Internet access in the Italian debate
- V. Internet access in constitutional jurisprudence: a comparative view
- VI. Internet access in the jurisprudence of European Court of Human Rights
- VII. The internet and the Italian Constitutional Court: a call waiting for answer
- VIII. Some concluding remarks

Digital Democracy. Risks and opportunities of the technological revolution: e-voting in the Italian and European context

- I. E-voting: a definition
- II. The spread of e-voting in Europe
- III. Electronic voting in Italy
- IV. The advantages of electronic voting
- V. What risks?
- VI. Some Proposals to Mitigate Risks: Council of Europe, EDPS and ENISA Opinions
- VII. Conclusions

IUS PUBLICUM EUROPAEUM

Digital rights and public powers: a European perspective on digital citizenship

- I. Premise
- II. The progressive definition of European digital citizenship. The "European Declaration on Digital Rights and Principles for the Digital Decade" and the centrality of individuals
- III. Concluding remarks. European digital administrative citizenship. Rights and duties

Algorithmic enforcement on cyberspace: legal boundaries of the use of automated content moderation on the European Union legal framework

- I. Introduction
- II. The general framework on algorithmic content moderation: the principle of no monitorization and safeguards against algorithmic curation on the DSA
- III. Automated moderation under the Directive on Copyright in the Digital Single Market and its compatibility with the principle of no general monitoring
- IV. The principle of no general monitoring and the DSA due diligence obligations

References

LOCAL GOVERNMENT LAW

Digitisation of public administration in small municipalities: administrative simplification and equal opportunities

- I. Introduction
- II. Digital transformation and ai in depopulated municipalities
- III. Administrative simplification and burden reduction in depopulated municipalities

Citizen participation in the digital age. A focus on the local level

- I. Towards a more participatory democracy
- II. Citizen participation and the communications revolution
- III. Focusing on participation and digitisation at the municipal level
- IV. Concluding remarks

TAX LAW

Automated decision making by tax authorities and the protection of taxpayers' rights in a comparative perspective

- I. Risks and opportunities associated with automated decision making by tax authorities
- II. A comparative overview of automated decision making in tax procedures...
- III. Regulatory challenges in the protection of taxpayers' rights

CRIMINAL LAW

Modern crimes. The case of digital identity protection

- I. Introduction
- II. The "digital" identity
- III. The legal good "deserves" the interest of criminal law
- IV. Digital identity can be stolen (and more)
- V. Identity theft. Can it be punished?
- VI. Article 640-ter (3) of the Criminal Code
- VII. Conclusions

AI and criminal law reform: notes on the inadequacy of a criminalization model based on a substantive principle

- I. ¿Time travel to criminalize Skynet? A science fiction scenario for today's regulation
- II. Substantive reasons for potential criminal law reform in the face of AI's emergence
- III. Automation, autonomy, scalability: singularities of AI and their relation to criminalization

IV. On the inadequacy of a criminalization model based on the question "why criminalize" in the face of the challenges of AI

LABOUR LAW

The digitalization of public employment services: different European practices and models compared

- I. Introduction
- II. The dematerialisation of active labour market policies and its implications
- III. The role of digital platforms in public employment service
- IV. The algorithmic profiling
- V. The automated job-matching applications
- VI. The experience of online-based training
- VII. Conclusions and future perspectives

Bibliography

The digitalization of public employment services: different European practices and models compared

- I. Introduction
- II. The dematerialisation of active labour market policies and its implications
- III. The role of digital platforms in public employment service
- IV. The algorithmic profiling
- V. The automated job-matching applications
- VI. The experience of online-based training
- VII. Conclusions and future perspectives

Bibliography

PROCEDURAL LAW

How Technology is Changing Witness Testimony: Few Remarks from an Italian Perspective

- I. Introduction
- II. Italian law of evidence and the impact of technology
- III. Witness testimony: traditional issues...
- IV. ...and new frontiers: 'software as the witness', videoconferencing and emojis
- V. Concluding remarks

PRIVATE COMPARATIVE LAW

Handling Artificial Intelligence and Data Control: a few considerations on the European and U.S. approach

- I. The Ubiquity of Artificial Intelligence as a Privacy Threat
- II. The Dimensions of Privacy: Balancing Confidentiality and Control in the European and American Framework
- III. California's Regulation of Data Circulation: Transparency as an instrument of protection
- IV. GDPR and CPRA face the Data-Driven Society: is it a different approach?
- V. Data Flows in the USA and Europe: some concluding remarks
