PART I PLANT BREEDING AND INTELLECTUAL PROPERTY RIGHTS

CHAPTER 1 - IMPROVING UPOV SYSTEM AS AN INSTRUMENT TO IMPLEMENT THE UN AGENDA 2030: NUTRITIONAL CONTENT AS A CHARACTERISTIC OF A NEW VARIETY PLANT

Anselmo Martínez Cañellas

- I.The agenda 2030 and the UPOV
- II.Proposals to increase the nutritional content of the new plant varieties and their fruits
- III.Nutritional content of the plant variety as a characteristic under the UPOV convention
 - 1.Nutritional Content as a Relevant Characteristic of a Variety under UPOV system
 - 2.Nutritional Content can be considered an Additional Characteristic of a Variety, under UPOV system
- IV.Conclusion
- References

CHAPTER 2 - ORGANIC VARIETIES UNDER REGULATION (EU) 2018/848: ANALYSIS OF THE CONCEPT AND PROPOSAL TO MAKE THEM COMPATIBLE WITH PLANT BREEDERS' RIGHTS

Juan Antonio Vives Vallés

- I.Introduction
 - 1.A brief introduction to the topic
 - 2.The background of the concept of “organic variety suitable for organic production”
- II.The concept of “organic variety suitable for organic production”
 - 1.The “variety” requirement of art. 3 (19) of Regulation (EU) 2018/848
 - 2.The requirement of art. 3(19)(a) of Regulation (EU) 2018/848
 - 3.The requirement of art. 3(19)(b) of Regulation (EU) 2018/848
- III.Other considerations
 - 1.“Derogations” to the use of “organic varieties suitable for organic production”
 - 2.Some additional considerations for a better use of “organic varieties suitable for organic production”
- IV.Conclusions
- References

CHAPTER 3 - RECENT CHANGES REGARDING THE EXCLUSION OF ESSENTIALLY BIOLOGICAL PROCESSES FOR THE PRODUCTION OF PLANTS AND ANIMALS. BETWEEN NARROW INTERPRETATION OF EXCLUSIONS AND MAINTENANCE OF THEIR EFFECTIVENESS

Tomasz Zimny

- I. Introduction
 - II. The exclusion of essentially biological processes
 - III. Narrow interpretation of exceptions and the EPO boards of appeal
 - IV. The Broccoli/Tomatoes decisions and their aftermath
 - V. The rule 28.2 and its outcomes for the application of other provisions of the EPC
 - VI. Conclusions
- References

CHAPTER 4 - THE (UN) PROTECTION OF AGRI-BIOTECHNOLOGICAL INNOVATION IN THE EU: WHEN REGULATIONS COLLIDE WITH REALITY

Leire Escajedo San-Epifanio

- 1. The regulatory framework of plant breeding in the EU knowledge-based economy: (at least) three decades of systematic deficiencies
 - 2. The EC STUDY on new genomic techniques, April 2021
 - 3. The ECJ judgement on mutagenesis: was it really so “surprising”?
 - 4. The current situation of the pre-market approval of plant innovations, in a Nutshell
 - 5. The Road To The Third Regulatory Reform Of The Premarket Approval Of GMOs
- Acknowledgements
- References

PART II GEOGRAPHICAL INDICATIONS

CHAPTER 5 - GEOGRAPHICAL INDICATIONS AND EUROPEAN AGRICULTURAL POLICIES

Natale Rampazzo

- I. European green deal: farm-to-fork and biodiversity
 - II. Labelling
 - III. Common agricultural policy 2023-2027
 - IV. New technology and short supply chain
 - V. New perspectives
- References

CHAPTER 6 - DEVELOPMENT OF INNOVATION STRATEGIES IN MANAGING GEOGRAPHICAL INDICATIONS IN THE FRUIT SECTOR TO MAINTAIN TRADITION AND QUALITY. CASE STUDIES FROM EUROPE AND LATIN AMERICA

Zulay Poggi

I.Learning process and technology transfer

II.Innovation process in GIs

III.Case studies

1.Case study 1./PGI “Cherries from the Mountain of Alicante”. (Alicante, Spain)

2.Case study 2. Peach from Calanda PDO-ES-0103, 07/11/2000. (Aragon, Spain, 2000)

3.Case study 3. Protected of Designation of origin Stromberger Pflaume (Germany, 2011)

4.Case study 4 Protected Geographical Indication (Café de Bocono de Venezuela), IG 0001.2020 May, 2022

5.Case study 5 Protected Designation of origin Cocoa from Chuao. Resolution 2006, November 14, 2000, Bulletin PI 443

IV.Discussion
