

TABLE OF CONTENTS

ABBREVIATIONS	11
CHAPTER I. BLOCKCHAIN, BUSINESS AND TODAY'S INTERNET. Pablo GARCÍA MEXÍA J.D., Ph.D.	15
1. BLOCKCHAIN TODAY	17
2. A TECHNOLOGY WITH MULTIPLE USES	23
3. THE DICHOTOMY PUBLIC BLOCKCHAINS VS. PRIVATE BLOCKCHAINS. ITS IMPORTANCE FOR THIS WORK	25
4. ONE LAST (BUT IMPORTANT) IDEA	28
BIBLIOGRAPHY	30
CHAPTER II. WHAT IS BLOCKCHAIN?. José MORALES BARROSO, PhD.	33
1. INTRODUCTION	35
2. THE BLOCKCHAIN: ELEMENTS THAT MAKE IT UP	37
2.1. The P2P Network	39
2.2. The Blockchain	40
2.3. The Distributed Register	41
2.4. The General Ledger	42
2.5. The Clients	42
2.6. Servers or Nodes	43
2.7. Tokens	44

Table of Contents

2.8.	Access to Data and Permissions	45
3.	SAFETY TECHNIQUES APPLIED IN BLOCKCHAIN	47
3.1.	Cryptography and Digital Signature	47
3.2.	Hash Mechanism	49
3.3.	Merkle Root	50
3.4.	Consensus Processes	51
3.5.	Blockchain Attacks.	55
4.	SMART CONTRACTS AND BLOCKCHAIN.	56
4.1	Blockchain Oracles	57
4.2.	Smart Contracts based on Blockchain . . .	58
5.	APPLICATIONS OF BLOCKCHAIN TECHNOLOGY.	59
5.1.	When is Blockchain technology suitable?	59
5.2.	The Distributed Trust Model.	61
5.3.	Cryptoassets and Financial Services	62
5.4.	Distributed Registration and Participatory Processes	63
5.5.	Decentralized Energy	64
5.6.	Blockchain and the Health Sector	67
5.7.	Blockchain in Logistics.	68
5.8.	Platforms, Consortia and Blockchain Organizations	70
5.8.1.	Bitcoin	71
5.8.2.	Ethereum	72
5.8.3.	Hyperledger	73
5.8.4.	Consortium R3	74
5.8.5.	Alastria	74
	BIBLIOGRAPHY	74
CHAPTER III. FROM CYBERLAW TO CRYPTOLAW. CRYPTOREGULATION. Pablo GARCÍA MEXÍA		77
1.	BLOCKCHAIN, A TECHNOLOGICAL ALTERNATIVE TO INTERMEDIATION	79

1.1.	The combination of P2P and cryptographic networks. Technological and socio-political background	81
1.2.	A new source of digital trust.	84
1.3.	Blockchain as a threat to intermediaries (including digital intermediaries)	86
1.4.	The limitations of "disintermediation".	88
1.4.1.	Permissioned networks, a great alternative for the future in Blockchain	89
1.4.2.	The sources of insecurity for cryptographically secure systems	95
1.4.3.	The survival of intermediaries	98
2.	LAW AND CRYPTOLAW	102
2.1.	From Lex Informatica to Cryptolaw	104
2.2.	Smart contracts or "cryptocontracts", the paradigm of Cryptolaw.	106
2.3.	Brief epilogue on private and permissioned networks.	112
3.	TOWARD CRYPTOREGULATION. CONDITIONS, PRINCIPLES AND (SOME) RULES.	113
3.1.	Cryptoassets in Blockchain.	116
3.1.1.	The problems of cryptoassets	117
3.1.2.	Consequences of the weight and problems of cryptoassets for cryptoregulation	119
3.2.	Chronological aspects. The pace of Cryptoregulation	121
3.3.	Objective aspects. The Subject-Matters of Cryptoregulation	124
3.3.1.	Regulation of cryptoassets.	124
3.3.2.	Regulate cryptocontracts?	130
3.3.3.	Other cryptoregulatory fields	132
3.4.	Subjective aspects. The addressees of cryptoregulation.	133

3.5.	Methodological aspects. (Cryptographic) code as a governance and regulatory technique.	136
3.5.1.	"Crypto-governance" or the cryptographic code as a governance technique.	136
3.5.2.	Cryptoregulation in a strict sense: Cryptographic code as a regulatory technique.	139
3.6.	Territorial aspects. Cryptoregulation's Jurisdiction.	145
4.	CONCLUSIONS	148
	BIBLIOGRAPHY	152
